### Mount on Your Touchmonitor

Your touchmonitor conforms to the VESA Flat Panel Monitor Physical Mounting Interface (FPMPMI) standard which defines a physical mounting interface for flat panel monitors, and corresponding standards for the panel-mounting mounting devices, such as wall and table arms. The VESA mounting interface is located on the back of your touchmonitor and is shipped pre-connected to the base.

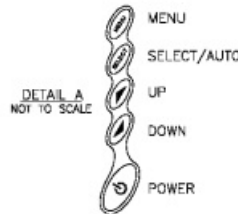

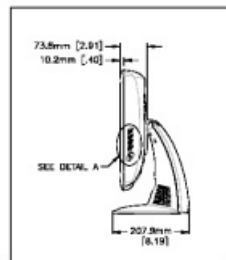

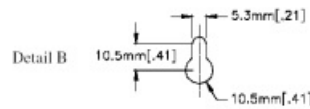

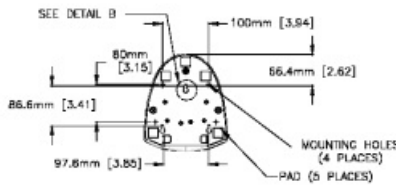

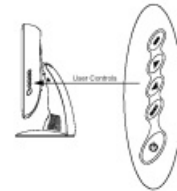

NOTE: The above drawing depicts the VESA mounting interface after the removal of the mounting cover and base.
